

## The following instructions will help you to install your template.

### How to install Joomla! template:

#### 1.Installation

There are two ways of installing Joomla! template:

- 1) Through the admin section of your Joomla! CMS
- 2) Manually (by copying all template files in the templates directory of your Joomla! CMS)

#### Installing through the installer of your Joomla! CMS:

- In the administrator section of your site please, go to the main menu, Extensions → Install/Uninstall.
- Then in the “Upload package file” section please, open the File upload dialogue box by clicking on the “browse” button, find the zipped template, click Open and then click Upload file & install.

Then go to the administrator’s section, by using the main menu please, go to Extension → Template manager → Site templates. Then choose the newly installed template by clicking on the radio box and click “Default” in the upper right corner. This will enable your template as a default one for your site.

#### Installing through the admin section of your Joomla! CMS site:

- The first thing to do is to copy the template to the “templates” folder of your Joomla! CMS.
- Then go to the administrator section and through the main menu go to Extension → Template manager.
- Choose the newly installed template by clicking on the radio box and select “Default” option. This will enable your template as a default one for your site.

#### 2.Changing modules position and applying class suffixes

Our templates are supplied with predefined module positions, for instance top menu is placed on the top block. That means that the “top menu” module should be assigned to Top position in the modules section. Right after Joomla! installation, modules are assigned to different positions, in order to make the template look as our live demo please, assign the modules to their positions and change the class suffix values in the following way.

- a) In the administrator section please, go to Extension → Module Manager
- b) Open each module from the list bellow and assign it to the given position by applying the class suffix as it is given in the table below:

Module Name	Position	Module Class Suffix	Published	Show title	Order	Menu Selection:	Additional info
Joomla! modules							
Breadcrumbs	breadcru mb	—	no	no			
Footer	footer	—	yes	no	2	all	

Main Menu	right	_menu	no	yes			
User Menu	right	—	no	yes			
Statistics	right	—	no	yes			
Login Form	right	_LoginForm	yes	yes	1	all exepted Home	
Archive	right	—	no	yes			
Sections	right	—	no	yes			
Related Items	right	—	no	yes			
Wrapper	right	—	no	yes			
Feed Display	right	—	no	yes			
Poll	right	—	no	yes			
Who's Online	right	—	no	yes			
Advertisement	right	—	no	yes			
Random Image	right	—	no	yes			
Syndication	syndicate	—	no	yes			
Newsflash	right	—	no	yes			
Latest News	left	—	no	yes			
Popular	right	—	no	yes			
Top Menu	user3	—	yes	no	1	all	
FooterMenu	footer	—	yes	no	1	all	
Search	user4	—	yes	no	1	all	
Slider	user9	_slider	yes	no	1	Home	

### VirtueMart modules

Shopping Cart	user6	—	yes	no	1	all	sources\modules \mod_virtuemart _cart_1.1.6.j15.zip
Currencies:	user5	—	yes	yes	1	all	sources\modules \mod_virtuemart _currencies_1.1.6 .j15.zip
Categories	user7	_categories	yes	no	1	all	sources\mod_vm _css_menu_v.1.3. 0.zip
Specials	right	-new	yes	yes	1	Home	sources\modules

							\mod_virtuemart _latestprod_1.1.6 .j15.zip
Random Products	user2	_s1	yes	yes	1	Random Products	sources\modules \mod_virtuemart _randomprod_1. 1.6.j15.zip
Our Products	user8	_scroll	yes	yes	1	Home	sources\modules \mod_xpertscroll er.zip
New Products	user2	-specials	yes	yes	1	Home	sources\modules \mod_virtuemart _featureprod_1.1 .6.j15.zip

- c) After all the necessary changes are applied please, save the values of each module by clicking the “save” button.

To make your Joomla! look like our live demo please, install the database dump that is located in sources\dump.sql.

### Attention!

*By default Joomla!! 1.5 installation comes with only the Main Menu module installed.*

*Therefore to make your Joomla! site look like our live demo please, install all necessary modules through the administration section of your site. Please, also add all the menu items and articles by yourself.*

### 3.Changing Menu Style

The top menu style should be set to “List”. In order to change the style please, go to Extensions → Module Manager and there please, choose Top Menu. In the opened window please, find the parameters field and set the Menu Style property to “List”. Make sure that menu class suffix is set to '-nav'. The main menu style should be set to “List”. To change the style please, go to Extensions → Module Manager and there please, choose Main Menu. In the opened window find please, the parameters field and set the Menu Style property to “List”.

### 4.Navigation menu settings

In order to make topmenu and mainmenu look exactly as on the Live Demo of your template please, go to Menus → [menuname] and create menu items.

### 5.Highlighting settings

To enable Full Active Highlighting (if it is available), you should please, go to Extensions → Module Manager → [menuname]: and set the Full Active Highlighting feature to “yes”.

### 6.Configuring columns position

It is necessary to set the number of columns on the front page to 1. In order to do that, please, go to Menus → [menuname]: Home, locate 'Parameters; Basic' and set Columns to 1. With that done, please, go to Menus → [menuname]: Blog and specify 1 as the value for the amount of columns as well.

### 7.How to add a new custom module to your template

Copy the content of sources\themes folder to the root of your Joomla! installation.

### 8.How to add a new custom module to your template

Please, enter the admin panel, and then find the Site → Global Configuration. Press the “Select” button and select – Editor – No Editor (in parameter - Default WYSIWYG Editor).

- Please, find the Extensions → Module Manager option. Press the "New" button in the top right corner:
- select "Custom HTML" and click "Next"
- in the "Title" field type the title of your new module;
- in the "Position" drop down box please, choose the correct position for the new module from the PDF file;
- in the "Module Class Suffix" field please, type the appropriate class suffix specified in the PDF file;
- in the "Content" text area please, put your own text;

After everything is done please, Press the "Save" button in the top right corner, and check your website.

### 9.Describes how to configure a banners:

## How to install VirtueMart template:

### 1.Download the latest version of VirtueMart from:

[http://dev.virtuemart.net/attachments/download/167/VirtueMart\\_1.1.6-COMPLETE\\_PACKAGE.j15.zip](http://dev.virtuemart.net/attachments/download/167/VirtueMart_1.1.6-COMPLETE_PACKAGE.j15.zip)

### 2.Install VirtueMart component:

- com\_virtuemart\_1.1.6.j15.zip  
and plugins:
- plugins\vmproductsnapshots\_1.1.6.j15.zip
- plugins\vmxsearch.plugin\_1.1.6.j15.zip

### 3.Please, install the module according to module's settings table.

### 4.Change permissions to 777 for following directories:

- components\com\_virtuemart\shop\_image\category\resized\
- components\com\_virtuemart\shop\_image\product\resized\
- components\com\_virtuemart\shop\_image\category\
- components\com\_virtuemart\shop\_image\product\
- components\com\_virtuemart\shop\_image\
- components\com\_virtuemart\themes\
- components\com\_virtuemart\

5. Copy the content of sources\themes folder to the root of your Joomla! Installation.

6. Change permissions back to 755 for directories listed in section 4.

7. Patch your Joomla! database with sources\dump.sql (only if you want sample contents)

**Warning!**

Patching the database with our sql dump will remove your data, so please back it up before patching.

8. Select the theme in your admin panel of VirtueMart (configuration→site→layout→Select the theme for your Store).

Now, you may go to your site and continue with editing.
